APPLICATION NO.	FILING DATE	FIRST NAMED INVENTOR	ATTORNEY DOCKET NO.	CONFIRMATION NO.
09/880,710	06/13/2001	Stavroula Kousteni	ANA 1007 US	5533
20786	7590	05/04/2004	EXAMINER	
KING & SPALDING LLP 191 PEACHTREE STREET, N.E. ATLANTA, GA 30303-1763			BASI, NIRMAL SINGH	
			ART UNIT	PAPER NUMBER
			1646	

DATE MAILED: 05/04/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>	
	09/880,710	KOUSTENI ET AL.	
	<b>Examiner</b>	<b>Art Unit</b>	
	Nirmal S. Basi	1646	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE \_\_\_\_ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on 2/8/04
- 2a) ☐ This action is **FINAL**.      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☐ Claim(s) (3) is/are pending in the application.
- 4a) Of the above claim(s) 1-7, 11-15, 37 is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☐ Claim(s) 8-10, 14-36 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 1/1/02 is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## **DETAILED ACTION**

### ***Election/Restriction***

1. Applicant's election of Group III ( Claims 8-10 and 16-36 drawn to methods of screening for a compound that will induce a non-genotropic effect) and the species of Vitamin D and second messenger on 2/8/04, is acknowledged. Applicant indicated claims 8-10 and 16-34 as being drawn to Group III, there appears to be an error, group III is directed to claims 8-10 and 16-36. Clarification is required. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 17 and 11-15 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

### **Objections**

2. a) The drawings filed 1/1/02 are objected to because the figures should be labeled as FIG. 1, FIG. 2 etc, and not as FIG. 1/10, FIG. 2/10 etc or the equivalent, as required by 37 C.F.R. § 1.84 (u)(1). The Figures must also be described in the Brief Description of the Drawings, at the beginning of each section as FIGS. 1A-E, FIG. 2A-B. Appropriate correction is required.

Appropriate correction of the drawing as indicated by examiner in this Office action is required.

Corrections to drawings cannot be held in abeyance. Applicant must submit proposed drawing corrections in response to the requirement in the Office action.

### **Timing of Corrections**

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.85(a). Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.

b) An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification (37 CFR 1.78) . The earlier applications are not contained in the first sentence of the specification.

### ***Claim Rejections - 35 USC § 112, Second Paragraph***

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 8-10, 16-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 8, 16, 27-36 are indefinite because it is not clear what is a selective nongenotropic effect so as to allow the metes and bounds of the claim to be determined

Claim 8 is indefinite because it is not clear what pathways is activated by a ligand-binding domain of the steroid receptor without substantially activating DNA-binding domain so as to allow the metes and bounds of the claim to be determined.

Art Unit: 1646

Further it is not clear when a compound substantially activates as compared to not substantially activating.

Claim 8 is indefinite because it is not clear what biological activity is being measured.

Claim 16 is indefinite because it not clear what is selective steroidal response as compared to a non-selective steroidal response effect so as to allow the metes and bounds of the claim to be determined. Further it is not clear how the transcriptional activity of the receptor is measured, Also, last paragraph of claim, it is not clear if both non-genotropic activity and transcriptional activity are less than 10%, or only the transcriptional activity is 10% of endogenous ligand.

Claim 18 is indefinite because it is not clear what is a signal transduction pathway, where does the pathway start and end so as to allow the metes and bounds of the claim to be determined

Claim 19 is indefinite because it is not clear what second messengers are considered non-genotropic activity so as to allow the metes and bounds of the claim to be determined

Claims 20-22 is indefinite because it is not clear what are the specific kinase signal transduction pathway, where do the pathways start and end so as to allow the metes and bounds of the claim to be determined.

Art Unit: 1646

Claims 23, 27, 28 is indefinite because it is not clear when a compound induces a nongenotopic effect without substantially inducing a genotropic response so as to allow the metes and bounds of the claim to be determined. Further it is not clear when a compound substantially activates as compared to not substantially activating. The preamble of the claim does not disclose the goal of the claim; it is not clear what the compound is being evaluated for.

Claim 26 is indefinite because it is not clear what is the target gene.

Claim 27 is indefinite because it is not clear what compound are considered artificial or natural steroid receptors so as to allow the metes and bounds of the claim to be determined. Further it is not clear which compound identified by claimed method would treat steroid receptor related diseases or disorders, as compared to those compounds that provide a positive result in the method and have no use as therapeutic agents. Further it is not clear what diseases are considered steroid receptor related diseases, what relationship has to be present for said diseases to be considered steroid receptor related.

Claim 28 is indefinite because it is not clear what compound are considered natural or artificial natural steroid receptors so as to allow the metes and bounds of the claim to be determined. Further it is not clear which compound identified by claimed method would treat steroid receptor related diseases or disorders, as compared to those compounds that provide a positive result in the method and have no use as therapeutic agents. Further it is not clear what diseases are considered steroid receptor related diseases, what relationship has to be present for said diseases to be considered

Art Unit: 1646

steroid receptor related. Also it is not clear what is measured when the level of transcription is determined. What is a pro-apoptic agent

Claim 29 is indefinite because it is not clear what compound are considered artificial or natural steroid receptors so as to allow the metes and bounds of the claim to be determined. What is extra cellular regulated kinase activation and how is it determined? Also it is not clear what is measured when the level of transcription is determined. What are considered minimal transcriptional levels as compared with non-minimal levels?

Claim 30, 31 is indefinite because it is not clear what is a functional engineered of modified forms of steroid receptor so as to allow the metes and bounds of the claims to be determined. What function is required., what is the critical feature of the form relating structure to function. Said a modified forms encompass an infinite number of variants, it is not clear which variants would be considered modified form of the steroid receptor. It is not clear what is the signal transduction pathway responsive transcriptional control unit.. What signal is transduced by the control unit. Further, it is not clear what is transduction pathway, where does the pathways start and end so as to allow the metes and bounds of the claim to be determined. Also, what is the reporter gene, what does it report and how is it measured?

Claim 33 is indefinite because it is not clear what is measured when the amount of transcription is measured, what genotropic activity is so as to allow the metes and bounds of the claim to be determined. What is extracellular regulated kinase activation and how is it determined?

Claim 35 is indefinite because it is not clear what is a genetic variant so as to allow the metes and bounds of the claim to be determined. Genetic variants encompass an infinite number of compounds. It is not clear what comprises a response element-reporter gene, serum response element-reporter gene construct. Further it is not clear when a compound activates the transcription of the response element-reporter gene construct without substantially effecting the transcription of the response element reporter gene construct as compared to when a compound activates the transcription of the response element-reporter gene construct by substantially effecting the transcription of the response element reporter gene construct

Claim 36 is indefinite because it is not clear what is a genetic variant so as to allow the metes and bounds of the claim to be determined. Genetic variants encompass an infinite number of compounds. It is not clear what comprises a response element-reporter gene, how is transcription determined, what is signal transduction pathway responsive transcriptional control unit, Further it is not clear when a compound activates the transcription of the second cell without substantially effecting the transcription of the first cell. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nirmal S. Basi whose telephone number is 571-272-0868. The examiner can normally be reached on 9:00 AM-5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yvonne Eyler can be reached on 571-272-0871. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
